- *In setting up a ballot in this format, you can cut them up and sort them very quickly!!!*
- *Try running different grade levels on different colors of paper*
- *If you use student counters, split the classes up and have students report to an adult - the adult does the final tally and no one student will really know the total vote count*
- *Hint - meet with all candidates and announce results before announcing to the school*

| Vote for #1 and #2 choice | Vote for 1 Candidate | Vote for 1 Candidate |
